- PHP (Object Orientated & MVC)
- SQL

Website & UX/UI Design

- Adobe Photoshop
- Adobe Illustrator
- Figma

Soft Skills

- Project management
- Client / stakeholder co-ordination, support & consultancy

Experience & Previous Roles

Web & Graphic Designer, Project Manager (contract role)

A-Plates Ltd, Westbury – from May 2025

My primary responsibilities at A-Plates are to design and manage a large library of icons and related graphics for customers to purchase, and to populate and project manage the launch of an accompanying Wordpress website.

Web Designer & Front-end Developer

*RomanCart Ltd, Bath & Huboo Technologies Ltd, Bristol – Nov 2011 to July 2024
(Huboo purchased RomanCart in Dec 2020)*

I worked mainly as a front-end developer and web designer at RomanCart - and later, Huboo - designing websites and web systems in Photoshop and Figma; and developing in HTML, CSS and, often complex, Javascript (Vanilla & jQuery).

- I designed, developed, managed and maintained a library of approximately 400 responsive “content blocks” for the company's customer web-builder. Examples included webpage headers, menus, interfaces, page layouts, banners, shopping carts and item pages.
- I built a unique GUI and specific CMS in to each block, allowing for a wide variety of customised appearances and layouts.
- I designed and developed a range of 100 responsive customer website themes.
- I designed, developed and project managed a large number of bespoke customer websites, and also a series of company websites.
- I handled ongoing customer consultancy and website support.
- I developed a PHP web application that remotely lists items on eBay.

Following a decline in Huboo's performance and an internal restructure, my position was made redundant in July 2024. I immediately began to look for a new position while also learning new skills, software and languages.

Web Designer & Full Stack Developer

JPC InfoNet Ltd, Trowbridge – Feb 2006 to Nov 2011

I worked as a web designer, and both a front-end, and back-end, developer at JPC. I designed websites in Photoshop, and developed the front-ends in HTML, CSS and Javascript (Vanilla & jQuery). I used PHP and ASP extensively for back-end development, using MySQL and Microsoft Access databases.

- I designed and developed websites for a series of large, government-affiliated bodies and multi-national companies, such as PETA, the Police, and Orange Guitar Amplifiers Ltd.
- I handled project management, customer consultancy, specification development and ongoing support for the majority of the projects that I undertook.
- I developed a range of bespoke content management systems to handle the unique requirements of each website.

Ecommerce Web Designer & Full Stack Developer

Freelancer – Jan 2010 to Nov 2011

Alongside my full time position at JPC, I began working as an ecommerce-specialist freelancer. I wrote an ecommerce system in PHP with a MySQL database. It was fully content managed and integrated in to a number of payment gateways, including SagePay, WorldPay, CardSave and PayPal. I used Google Adwords to sell websites to a small number of clients, customising the system as required and creating unique web designs for each project.

Web Designer & Front-end Developer

Impress Media Ltd, Warminster – Sep 2003 to Feb 2006

I worked as a web designer and static front-end developer at Impress. Designing in Photoshop and developing in HTML, I created websites for their expanding portfolio of regional SMEs. I was the only web designer and developer in the company initially, so I was expected to manage a number of projects simultaneously, be adaptable, and often work to tight deadlines.

Web Designer & Front-end Developer

Freelancer – Sep 2002 to Sep 2003

To gain commercial experience, I began a short freelancing career after leaving university. Designing in Photoshop and developing in HTML and Adobe (Macromedia) Flash, I created a number of websites for local businesses. I was able to use this experience, and the portfolio that I had established from it, to successfully apply for my first agency position.

Education

- BA(hons) Degree in Visual Communication - 2.1 (University of Central England, 2001)
- Art & Design Foundation National Diploma - Merit (Trowbridge College, 1998)
- 3 A levels - grades A to C (St Laurence School, Bradford on Avon, 1997)
- 9 GCSEs - grades A* to C (St Laurence School, Bradford on Avon, 1995)
